The Treatment Cost Calculator uses your GE benefits and coverage information to estimate your share of the costs for many common conditions and services. In minutes, you can:

- Search for a medical treatment, service or condition
- Find physicians, hospitals and clinics in your area
- Review a general estimate of your costs
- Compare those providers by quality, cost and location
- Find physicians, hospitals and clinics in your area
- Compare those providers by quality, cost and location

The tool will break down your projected costs and display low, likely and high estimates. You can then use the “compare” feature to locate doctors and facilities near you, see their locations on a map and review contact information, costs, network status and credentials. You can then print, save, or email a copy of that page to read at your convenience.

Get an estimate for a specific service or procedure and search more broadly by treatment or service types, such as:

- Outpatient procedures
- Vaccines and immunizations
- Inpatient procedures
- Diagnostic tests and X-rays
- Office visits
- Lab tests

All estimates are based on your age and gender; your current benefits status (such as deductibles, co-insurance, and network), and historical cost data for each doctor and facility. So you can shop around and make an informed purchase, just as you would with any other product or service.

Stop taking chances with your health care costs. Before you make any important care decisions, go to treatmentcostcalculator.com/ge

Please note:
The information contained on this site is provided to you at the request of your employer to better inform you on health care matters. The information included in this tool is accurate, to the best of our knowledge, at the time of creation. However, the underlying historic and medical healthcare claims, eligibility and benefit coverage information from which this information is derived comes from third parties that are not affiliated with Truven Health Analytics and over whom Truven Health Analytics has no control. Regardless of the source of information provided, Truven Health Analytics is not liable to you for any damages of any kind resulting from your access to or your use of the information provided.

The Treatment Cost Calculator is provided as a guide to assist you in determining your approximate costs based on the treatment option you selected and the benefit information available at the time the estimate is generated. This information is intended for your general use only and is not a substitute for medical advice from or treatment by a medical professional for specific medical conditions. Estimates are not intended to be an exact calculation of claim payment and do not contain all health benefit plan terms, conditions, limitations, and exclusions that may apply to your coverage. To confirm and verify your coverage, please refer to Your Benefits Handbook.
